Hybrid Memory Cube Specification 1

memory the key to consciousness 1st edition Memory is the faculty of the brain by which information is encoded, stored, and retrieved when needed.. Memory is vital to experiences, it is the retention of information over time for the purpose of influencing future action. If we could not remember past events, we could not learn or develop language, relationships, or personal identity (Eysenck, 2012).

memory the key to consciousness 1st edition Flash memory is an electronic (solid-state) non-volatile computer storage medium that can be electrically erased and reprogrammed.. Toshiba developed flash memory from EEPROM (electrically erasable programmable read-only memory) in the early 1980s and introduced it to the market in 1984. [citation needed] The two main types of flash memory are named after the NAND and NOR logic gates.
